

DRONE SURVEY SERVICES

Early identification, non intrusive and rapidly deployable detection

THE SOLUTION

The use of drones provides quick, cost-effective, non-invasive solutions for surveying, inspections, or monitoring many different services or situations.

The VPS drone service provides an ideal solution for inspecting and surveying hard-to-access structures, land, infrastructure projects or road networks, removing the need for costly specialist access equipment.

VPS clients have also benefited from the use of drones to monitor people safety during high risk evictions and provide detailed footfall analysis at public events.

KEY POINTS

- Local Police notification before any inspection
- Comprehensive pre-flight risk assessment
- On-site risk assessment
- Fully governed by the CAA
- Full liaison with air traffic control where necessary
- Pedestrian restrictions imposed where necessary
- High quality resolution allowing for easy zoom in
- Data available within 24 hrs of flight

DRONE SERVICE OPTIONS

Our drone services are broken down into **four** different price brackets. Each service includes **cloud storage** where footage can be viewed or downloaded within **24hours** of the flight taking place.

Complex One

Residential Property or very small commercial site with little pre-flight organisation

Complex Two

Small commercial site, small block of flats or complex residential where more pre-flight checks required

Complex Three

Large Stately home/high net worth property, or larger commercial building in central towns and cities

Complex Four

Very large commercial site with multiple buildings over large area of land

We also offer fully bespoke services. If what you need isn't listed, get in touch and we will do our best to assist.
